

## **INSTALLATION INSTRUCTIONS**

### **HALION**

Copy the Entire Wave Alchemy sample pack folder to your hard drive ensuring that all folder structure remains intact.

When Loading Halion Patches you may need to locate the samples.

This is simply done by double clicking the fpx file (Halion Patch) within the Halion Browser window, and when prompted click on the automatic or manual search button, then locate the Root folder of the pack you have purchased. Halion will then find the samples for the patch.

It is advisable to then resave the patch so you will not have to repeat this procedure.

### **EXS24**

Copy the instrument files (\*.exs) to your "Sampler Instruments" folder for Logic.

This folder is located:

...username/Library/Application Support/Logic/Sampler Instruments

Copy the sample pack folder to ...username/Library/Application Support/Logic/Sampler Files

The next time you Load EXS24 the patches will be seen in the EXS24 browser window.

OSX 10.9 and above – In the finder app click 'Go' whilst holding down the alt key to show the hidden 'Library' option in the drop down menu.

Choose 'Library' then go to /Application Support/Logic/Sampler Instruments/

Create a new folder in the above directory e.g. Drum Tools 01 and copy the preset patches into the new folder.

The next time you load EXS24 you will see the patches in the main instrument load drop down menu.

### **NN-XT**

Copy the Entire Wave Alchemy sample pack folder to your hard drive ensuring that all folder structure remains intact.

Click on the load patch tab on the NNXT instrument and use Reason's Browser to locate the NNXT folder within the Sample Pack and load desired patch.

## **KONTAKT**

Copy the Entire Wave Alchemy sample pack folder to your hard drive ensuring that all folder structure remains intact.

Use Kontakt's Browser to locate the KONTAKT folder within the Sample Pack and load desired patch.
